CODELAND

WE PUSH YOUR **ADOBE AEM** **EXPERIENCE** INTO THE FUTURE

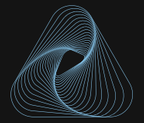
SEE OUR STORIES

CASE #1: NEW DIGITAL TRANSFORMATION

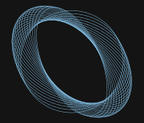
HEAD OF DIGITAL

> We were starting a new set of Digital Transformation projects.
> We needed a company with a deep knowledge and experience in Adobe Technologies, with the right level of flexibility and the dynamism to interact with my team, supporting us in every step of our strategic development plan. We were looking for help to take the right decisions for using AEM at its full potential.

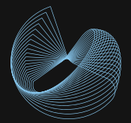
CODELAND WAS THE BEST CHOICE BECAUSE



A team with advanced technical and analytical skills that was able to achieve our goals, with great ability to communicate with all our team members.



Reliable support and cost management of the project, thanks to a careful planning and high flexibility in requirements management.



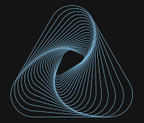
Strong synergy and integration capabilities during development and graphic design.

CASE #2: SOS, LOOKING FOR HELP

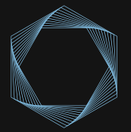
IT MANAGER

> We were stuck in a difficult situation with an unstable platform and really poor AEM performances. The system was unflexible and far away from our initial expectations. I needed to protect my investment by finding a company able to refactor the existing solution, giving back us confidence in our system environment and adding value to the overall integrated solution.

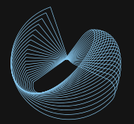
CODELAND WAS THE BEST CHOICE BECAUSE



A team with a solid experience with the AEM platform architecture, able to quickly analyze, identify, and resolve our main problems.



A team completely focused on performance and stability, optimizing the solution over the available resources.



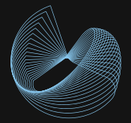
A team able to understand our editorial needs optimizing templates and components, refactoring solutions with new design patterns.

CASE #3: INTEGRATION

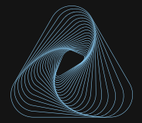
CHIEF TECHNOLOGY OFFICER

> I needed a strong integration between AEM and my local systems, designing and building customized communication interfaces fulfilling security policies and reliability requirements. I was looking for a company with a great know-how on the platform, able to customize and evolve it with specific implementations and leveraging out of the box functionalities.

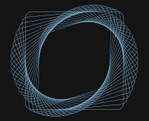
CODELAND WAS THE BEST CHOICE BECAUSE



A team with a deep AEM knowledge, able to identify the correct balance between out of the box functionalities and new developments.



A team with strong technical and design skills, able to support and improve teams communications.



A team with a long term experience in the integration of external technologies related to e-commerce, CRM, and ERP.
